

Exploring Wonder

A group of parents won a race so they were picked to be the people to go up to space to explore a new planet called wonder. Before they even went on the spaceship, they were nervous because they have never been on something this crazy like a spaceship.

Before they even got on the spaceship, they had an argument about who was going to be next to the window to gaze out of it. After that, they decided who was going to sit next to the window, it was Bobby and Max. The girls were going to watch from the back seat. They put on their astronaut suits and they were super nervous to go on the spaceship. They eventually stopped worrying and got on the spaceship.

Suddenly the rocket starts beeping uncontrollably and none of the parents know how to fix this. The girls got terrified and the boys tried to fix it. One of the women, Emma (26), gazed outside the window and noticed a massive meteor floating away from them. "Is everybody ok?" asked Rebecca, the other woman on board. Max replied "I'm ok, are you?"

"Yeah, I think so, what are we going to do about the broken pieces?" asked Rebecca. Everybody was worried, so Max calmed them down and began searching for parts. Will they be able to fix the parts?

The boys started to search for a button that can stop the beeping Max was pretty right about saying "We can't find a button with only 2 people" Bobby agreed. Rebecca started searching and helped the 2 boys Emma was terrified and screamed "WHY ARE YOU NOT CHECKING THE EMERGENCY ROOM?" Bobby and Rebecca started searching the emergency room and found a lever. They brought it back and fixed the beeping. Everybody said "thank god".

BLACK HOLE!!!!!!!

They didn't know what the beeping was for until the spaceship did an threesixty one of the boosters was damaged the boy fixed it. After that everybody was absolutely worried and terrified. After forty eight hours they woke up and landed in wonder. They were happy after they grabbed some stones and some objects and headed back to earth. They showed some people what they got and put them in the museum. Then the girls saw a meteor coming. All of them screamed. The meteor hit one of the boosters. and a boy had to go figure it out. 25 minutes later the boy fixed it and they landed on wonder.
