

The disastrous day
Off earth

Last month, a group of kids were invited to go on a space mission to explore and study all about Saturn! Although Ava ,who was completely petrified, didn't want to go at all . Charlie on the other hand knew too much about space(especially Saturn), and was too excited. Olivia was just sitting there waiting for the spaceship to set off into deep,dark space! “Don’t worry guys if you get worried come to me I will calm you down” exclaimed Charlie ,who was acting super brave.How can I be brave? We are going to be in the sky!”

They heard the countdown echo through the spaceship “10 9 8” they all jumped “7 6 5 4” Ava still unsure if she wanted to go or not “3 2 1” “BLAST OFF !!!!!!!!!!!!!!!” Ava started gripping on to her seat screaming for her life thinking she was going to die.

“Help i'm going to die” screamed Ava.

“No you are not, rockets just set off fast ,don't worry” explained Charlie.

They all saw stars, black holes and loads of colourful violet and blue nebulas.

“Unbelievable,” Olivia gasped, “I never thought I would ever go to space!”

A few hours later the spaceship lost control and started to spin in circles then they all panicked. Charlie was fine, he tried to fix the spaceship but he couldn't find anything to fix it

“Come on, come on I need something to fix it!” Exclaimed charlie

“I don't think we can!” exclaimed Ava...

Charlie ran up and down through the spaceship not finding anything, but then he found a staircase and decided to walk up it not knowing it was a second floor.

“Come on guys, I found a staircase!” shouted charlie

“Okay !” shouted the others

“Wow it's another floor!!” I will see if I can find something here....
explained charlie...

Would they survive this disaster?

A few hours later charlie found a way to fix the spaceship

“Guys guys i think i fixed the spaceship”

“Yes you did!” shouted olivia

“The connection is back onto the spaceship!” explained charlie!

They all were back to their happy self and carried on their journey to Saturn and studied its rings.
