

A meter in space

Last week, three giant teenage recruits had a chance to go to Mars to see the space rock [which was as red as the blood moon]. Jaiden was frightened because he failed the astro test twenty times. Joe Was excited because he aced the test and Bobby was just there to calm everyone down because he had been studying for five years.

As the countdown started , it echoed throughout the whole ship, everyone buckled up their seat belts and sat tere ready. The Rockets thrusted up in the sky. They saw :the moon orbiting the earth,the bright stars,the sun glaring through windows,mars,black holes.

Jaiden curled up in his seat and he exclaimed" is this safe i want my mommy". Bobby shouted over all of the noise" yes this super safe if you keep still and don't touch anything.

Suddenly, a huge asteroid hit the top of the space shuttle and a bit peeled of Jaiden screeched" i want my mama and my dada" Bobby exclaimed" shut up and just hold your breath".

Everyone was thinking about what they could do in this terrible ordeal.

Bobby,who was feeling brave,chose to look for stuff to fix the huge hole in the roof. He was going all by himself ,but Joe, overcoming fear, said "I will come with you". "Come on then we do not have all day" replied Bobby.while running to find the storage room they kept on going in circles because the ship was gigantic. Eventually they found the storage room.

joe realised they need a key so he turned to bobby and said "do you have a key for it" Bobby Exclaimed" ofcores i do why wouldn't I". He opened it as

quickly as possible and they found iron plates (heavy iron plates) and a soldering iron (heavy duty soldering iron). They ran quickly back to the main headquarters to fix everything up. Joe held up the iron plates so Bobby could melt it down and stick it to the roof. Jaiden was in the corner still crying. they set their trajectory back to Earth they should be back in twenty minutes
